## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-5,7,8,12,16 & 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Miller (3,693,370) in view of Copeman (1,887,580). Miller a cooling device comprising: an insulated box (24), coil tubes (25) running under a dry ice, a plenum (27) for removing liquid condensate, a radiator (13) consisting of a fan (31) for cooling refrigerate within the coil/tubes and furthermore consisting of side walls (see figure 2). Miller, however lacks a block of ice situated above a refrigerate coil.

Copeman teaches a block of ice situated above a refrigerate coil. It would have been obvious to one of ordinary skill in the art at the time of the invention was made to modify and/or provide the disclosed invention of Miller with a block of ice as taught by Copeman as a more efficient means or method of cooling a refrigerate with a coil tube.

### ***Allowable Subject Matter***

Claims 6,9-11 & 13-15 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
